

**Warning!** Do not install the Citrix client below if you are already using a Citrix client for any other application (Winforms, etc.). Proceed to Step 3 below and download the Tempo Configuration File to your Desktop. If you install this version of the Citrix client and you have an existing Citrix client for another application, neither connection may work.

1) [Download the Citrix client](#). Save the file to your desktop.

How to save this file to your Desktop:

- Safari - In the Downloads window, click on the magnifying glass on the same line as the file name. Drag the file to the Desktop.
- Firefox – In the Downloads window, right-click (or option-click) on the file name and select the “Show in Finder” option. Drag the file from the window that opens to your Desktop
- Opera - A download dialog box will open, asking you where you want to save the file. Save it to the Desktop.

2) Minimize the browser window. In the “MetaFrame Presentation Server Client” window double-click on **ICA Client.pkg**. Follow the prompts to install the Citrix client.

**Note: If you do not see this window, double-click the MacICA\_OSX.dmg.zip icon on your Desktop.**

3) [Download the Tempo Configuration File](#) and save it to the Desktop.

4) You can now access Tempo by double clicking the **Sandicor-T5.ica** file on your Desktop.
